

# The SCC CargoBar™ has features you've never seen before at such an affordable price.

The SCC CargoBar™ with variable adjustment offers:

**Adjustment** - The CC5000 CargoBar™ continuously adjusts from 48" to 108". By adjusting down to 48 inches, this cargo bar requires less storage area.

**Reduce Theft** - Keep CargoBars™ safe by storing them in a toolbox or in the truck cab.

**Versatility** - Features a securement range from small truck beds to full high cube trailer width. Offering cargo securement options not found in other bars

**More Power** - Testing proves up to 20% more holding power than traditional loadlocks. By adding the optional Track Lock kit (#CC5015), the SCC CargoBar™ can easily be adapted for use in A & E Track, doubling the front to back holding power of the bar.

Solved.**

U.S. Patent Pending

# The SCC CargoBar™ has these unique features you've never seen in other loadlocks

A combination of high leverage and flexible feet provide superior holding power. Square steel vs. round rod provides a stronger bar (less susceptible to bending with more contact area to cargo).

Spring loaded push buttons provide positive locking in a closed or open position and are easy to operate.

The coated lever provides smooth, comfortable operation. Closed bar locking tab is easily unlocked with convenient thumb release.

With the optional Track Lock kit (#CC5015), the SCC CargoBar™ can easily be adapted for use in A & E Track, doubling the front to back holding power of the bar.

### WARNING

#### SCC CargoBar (part # CC5000)

- Do NOT use SCC's CargoBar™ to support ANY vertical loads. SCC's CargoBar™ is NOT designed to be used as a shoring beam or a step.
- SCC's CargoBar™ is not designed to secure cargo, only to assist in the stability of the load.
- SCC's CargoBar™ is designed to push out approximately one inch against flexible van trailer walls and can be damaged if used against immovable objects such as door frames.

#### SCC Track Lock (part # CC5015)

- SCC's optional Track Lock feature increases horizontal holding power for the purpose of load stabilization only.
